MG16XU / MG16
MG12XU / MG12

Owner's Manual

Precautions **pages 5, 6**

Quick Start Guide **pages 9 to 11**

Troubleshooting **pages 29 to 31**

The above warning is located on the rear of the unit.
L'avertissement ci-dessus est situé à l'arrière de l'appareil.

Explanation of Graphical Symbols Explication des symboles

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.
L'éclair avec une flèche à l'intérieur d'un triangle équilatéral est destiné à attirer l'attention de l'utilisateur sur la présence d'une « tension dangereuse » non isolée à l'intérieur de l'appareil, pouvant être suffisamment élevée pour constituer un risque d'électrocution.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.
Le point d'exclamation à l'intérieur d'un triangle équilatéral est destiné à attirer l'attention de l'utilisateur sur la présence d'instructions importantes sur l'emploi ou la maintenance (réparation) de l'appareil dans la documentation fournie.

IMPORTANT SAFETY INSTRUCTIONS

- 1 Read these instructions.
- 2 Keep these instructions.
- 3 Heed all warnings.
- 4 Follow all instructions.
- 5 Do not use this apparatus near water.
- 6 Clean only with dry cloth.
- 7 Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- 8 Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- 9 Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- 10 Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- 11 Only use attachments/accessories specified by the manufacturer.
- 12 Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
- 13 Unplug this apparatus during lightning storms or when unused for long periods of time.
- 14 Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

WARNING

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPARATUS TO RAIN OR MOISTURE.

(UL60065_03)

PRÉCAUTIONS CONCERNANT LA SÉCURITÉ

- 1 Lire ces instructions.
- 2 Conserver ces instructions.
- 3 Tenir compte de tous les avertissements.
- 4 Suivre toutes les instructions.
- 5 Ne pas utiliser ce produit à proximité d'eau.
- 6 Nettoyer uniquement avec un chiffon propre et sec.
- 7 Ne pas bloquer les orifices de ventilation. Installer l'appareil conformément aux instructions du fabricant.
- 8 Ne pas installer l'appareil à proximité d'une source de chaleur comme un radiateur, une bouche de chaleur, un poêle ou tout autre appareil (y compris un amplificateur) produisant de la chaleur.
- 9 Ne pas modifier le système de sécurité de la fiche polarisée ou de la fiche de terre. Une fiche polarisée dispose de deux broches dont une est plus large que l'autre. Une fiche de terre dispose de deux broches et d'une troisième pour le raccordement à la terre. Cette broche plus large ou cette troisième broche est destinée à assurer la sécurité de l'utilisateur. Si la fiche équipant l'appareil n'est pas compatible avec les prises de courant disponibles, faire remplacer les prises par un électricien.
- 10 Acheminer les cordons d'alimentation de sorte qu'ils ne soient pas piétinés ni coincés, en faisant tout spécialement attention aux fiches, prises de courant et au point de sortie de l'appareil.
- 11 Utiliser exclusivement les fixations et accessoires spécifiés par le fabricant.
- 12 Utiliser exclusivement le chariot, le stand, le trépied, le support ou la table recommandés par le fabricant ou vendus avec cet appareil. Si l'appareil est posé sur un chariot, déplacer le chariot avec précaution pour éviter tout risque de chute et de blessure.
- 13 Débrancher l'appareil en cas d'orage ou lorsqu'il doit rester hors service pendant une période prolongée.
- 14 Confier toute réparation à un personnel qualifié. Faire réparer l'appareil s'il a subi tout dommage, par exemple si la fiche ou le cordon d'alimentation est endommagé, si du liquide a coulé ou des objets sont tombés à l'intérieur de l'appareil, si l'appareil a été exposé à la pluie ou à de l'humidité, si l'appareil ne fonctionne pas normalement ou est tombé.

AVERTISSEMENT

POUR RÉDUIRE LES RISQUES D'INCENDIE OU DE DÉCHARGE ÉLECTRIQUE, N'EXPOSEZ PAS CET APPAREIL À LA PLUIE OU À L'HUMIDITÉ.

(UL60065_03)

FCC INFORMATION (U.S.A.)

1. IMPORTANT NOTICE: DO NOT MODIFY THIS UNIT!

This product, when installed as indicated in the instructions contained in this manual, meets FCC requirements. Modifications not expressly approved by Yamaha may void your authority, granted by the FCC, to use the product.

2. IMPORTANT:

When connecting this product to accessories and/or another product use only high quality shielded cables. Cable/s supplied with this product **MUST** be used. Follow all installation instructions. Failure to follow instructions could void your FCC authorization to use this product in the USA.

3. NOTE:

This product has been tested and found to comply with the requirements listed in FCC Regulations, Part 15 for Class "B" digital devices. Compliance with these requirements provides a reasonable level of assurance that your use of this product in a residential environment will not result in harmful interference with other electronic devices. This equipment generates/uses radio frequencies and, if not installed and used according to the instructions found in the users manual, may cause interference harmful to the operation of other electronic devices. Compliance with FCC regulations does not guarantee that interference will not occur in all

installations. If this product is found to be the source of interference, which can be determined by turning the unit "OFF" and "ON", please try to eliminate the problem by using one of the following measures:

Relocate either this product or the device that is being affected by the interference.

Utilize power outlets that are on different branch (circuit breaker or fuse) circuits or install AC line filter/s.

In the case of radio or TV interference, relocate/reorient the antenna. If the antenna lead-in is 300 ohm ribbon lead, change the lead-in to co-axial type cable.

If these corrective measures do not produce satisfactory results, please contact the local retailer authorized to distribute this type of product. If you can not locate the appropriate retailer, please contact Yamaha Corporation of America, Electronic Service Division, 6600 Orangethorpe Ave, Buena Park, CA90620

The above statements apply **ONLY** to those products distributed by Yamaha Corporation of America or its subsidiaries.

* This applies only to products distributed by YAMAHA CORPORATION OF AMERICA.

(class B)

COMPLIANCE INFORMATION STATEMENT (DECLARATION OF CONFORMITY PROCEDURE)

Responsible Party : Yamaha Corporation of America
Address : 6600 Orangethorpe Ave., Buena Park,
Calif. 90620
Telephone : 714-522-9011
Type of Equipment : Mixing Console
Model Name : MG20XU/MG16XU/MG12XU

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- 1) this device may not cause harmful interference, and
- 2) this device must accept any interference received including interference that may cause undesired operation.

See user manual instructions if interference to radio reception is suspected.

* This applies only to products distributed by
YAMAHA CORPORATION OF AMERICA.

(FCC DoC)

IMPORTANT NOTICE FOR THE UNITED KINGDOM Connecting the Plug and Cord

WARNING: THIS APPARATUS MUST BE EARTHED IMPORTANT. The wires in this mains lead are coloured in accordance with the following code:

GREEN-AND-YELLOW	: EARTH
BLUE	: NEUTRAL
BROWN	: LIVE

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:

The wire which is coloured GREEN-and-YELLOW must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol  or colored GREEN or GREEN-and-YELLOW.

The wire which is coloured BLUE must be connected to the terminal which is marked with the letter N or coloured BLACK.

The wire which is coloured BROWN must be connected to the terminal which is marked with the letter L or coloured RED.

(3 wires)

이 기기는 가정용(B급) 전자파적합기기로서 주로 가정에서 사용하는 것을 목적으로 하며, 모든 지역에서 사용할 수 있습니다.

(class b korea)

In Finland: Laite on liitettävä suojamaadoituskoskettimilla varustettuun pistorasiaan.

In Norway: Apparatet må tilkoples jordet stikkontakt.

In Sweden: Apparatens skall anslutas till jordat uttag.

(class I hokuo)

Information for users on collection and disposal of old equipment:

This symbol on the products, packaging, and/or accompanying documents means that used electrical and electronic products should not be mixed with general household waste.

For proper treatment, recovery and recycling of old products, please take them to applicable collection points, in accordance with your national legislation.

By disposing of these products correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling.

For more information about collection and recycling of old products, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items.

For business users in the European Union:

If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

Information on Disposal in other Countries outside the European Union:

This symbol is only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

(weee_eu_en_02)

PRECAUTIONS

PLEASE READ CAREFULLY BEFORE PROCEEDING

Please keep this manual in a safe place for future reference.

WARNING

Always follow the basic precautions listed below to avoid the possibility of serious injury or even death from electrical shock, short-circuiting, damages, fire or other hazards. These precautions include, but are not limited to, the following:

Power supply/power cord

- Do not place the power cord near heat sources such as heaters or radiators, and do not excessively bend or otherwise damage the cord, place heavy objects on it, or place it in a position where anyone could walk on, trip over, or roll anything over it.
- Only use the voltage specified as correct for the device. The required voltage is printed on the name plate of the device.
- Use only the supplied power cord/plug.
If you intend to use the device in an area other than in the one you purchased, the included power cord may not be compatible. Please check with your Yamaha dealer.
- Check the electric plug periodically and remove any dirt or dust which may have accumulated on it.
- Be sure to connect to an appropriate outlet with a protective grounding connection. Improper grounding can result in electrical shock, damage to the device(s), or even fire.

Do not open

- This device contains no user-serviceable parts. Do not open the device or attempt to disassemble the internal parts or modify them in any way. If it should appear to be malfunctioning, discontinue use immediately and have it inspected by qualified Yamaha service personnel.

Water warning

- Do not expose the device to rain, use it near water or in damp or wet conditions, or place on it any containers (such as vases, bottles or glasses) containing liquids which might spill into any openings. If any liquid such as water seeps into the device, turn off the power immediately and unplug the power cord from the AC outlet. Then have the device inspected by qualified Yamaha service personnel.
- Never insert or remove an electric plug with wet hands.

Fire warning

- Do not put burning items, such as candles, on the unit.
A burning item may fall over and cause a fire.

If you notice any abnormality

- When one of the following problems occur, immediately turn off the power switch and disconnect the electric plug from the outlet. Then have the device inspected by Yamaha service personnel.
 - The power cord or plug becomes frayed or damaged.
 - It emits unusual smells or smoke.
 - Some object has been dropped into the device.
 - There is a sudden loss of sound during use of the device.
- If this device should be dropped or damaged, immediately turn off the power switch, disconnect the electric plug from the outlet, and have the device inspected by qualified Yamaha service personnel.

CAUTION

Always follow the basic precautions listed below to avoid the possibility of physical injury to you or others, or damage to the device or other property. These precautions include, but are not limited to, the following:

Power supply/power cord

- When removing the electric plug from the device or an outlet, always hold the plug itself and not the cord. Pulling by the cord can damage it.
- Remove the electric plug from the outlet when the device is not to be used for extended periods of time, or during electrical storms.

Location

- Do not place the device in an unstable position where it might accidentally fall over.
- Do not block the vents. This device has ventilation holes at the bottom/sides to prevent the internal temperature from becoming too high. In particular, do not place the device on its side or upside down. Inadequate ventilation can result in overheating, possibly causing damage to the device(s), or even fire.
- Do not place the device in a location where it may come into contact with corrosive gases or salt air. Doing so may result in malfunction.
- Before moving the device, remove all connected cables.
- When setting up the device, make sure that the AC outlet you are using is easily accessible. If some trouble or malfunction occurs, immediately turn off the power switch and disconnect the plug from the outlet. Even when the power switch is turned off, electricity is still flowing to the product at the minimum level. When you are not using the product for a long time, make sure to unplug the power cord from the wall AC outlet.
- When rackmounting the device, always use two or more people. Attempting to lift the device by yourself may damage your back, result in other injury, or cause damage to the device itself.
- If the device is mounted in an EIA standard rack, carefully read the section "Precautions for Rack Mounting" on page 35. Inadequate ventilation can result in overheating, possibly causing damage to the device(s), malfunction, or even fire.

Connections

- Before connecting the device to other devices, turn off the power for all devices. Before turning the power on or off for all devices, set all volume levels to minimum.

Maintenance

- Remove the power plug from the AC outlet when cleaning the device.

Handling caution

- Do not insert your fingers or hands in any gaps or openings on the device (vents).
- Avoid inserting or dropping foreign objects (paper, plastic, metal, etc.) into any gaps or openings on the device (vents). If this happens, turn off the power immediately and unplug the power cord from the AC outlet. Then have the device inspected by qualified Yamaha service personnel.

- Do not rest your weight on the device or place heavy objects on it, and avoid use excessive force on the buttons, switches or connectors.
- Do not use speakers or headphones for a long period of time at a high or uncomfortable volume level, since this can cause permanent hearing loss. If you experience any hearing loss or ringing in the ears, consult a physician.

Yamaha cannot be held responsible for damage caused by improper use or modifications to the device, or data that is lost or destroyed.

NOTICE

To avoid the possibility of malfunction/damage to the product, damage to data, or damage to other property, follow the notices below.

■ Handling and Maintenance

- Do not use the device in the vicinity of a TV, radio, stereo equipment, mobile phone, or other electric devices. Otherwise, the device, TV, or radio may generate noise.
- Do not expose the device to excessive dust or vibration, or extreme cold or heat (such as in direct sunlight, near a heater, or in a car during the day), in order to prevent the possibility of panel disfiguration, unstable operation, or damage to the internal components.
- Do not place vinyl, plastic or rubber objects on the device, since this might discolor the panel.
- When cleaning the device, use a dry and soft cloth. Do not use paint thinners, solvents, cleaning fluids, or chemical-impregnated wiping cloths.
- Condensation can occur in the device due to rapid, drastic changes in ambient temperature—when the device is moved from one location to another, or air conditioning is turned on or off, for example. Using the device while condensation is present can cause damage. If there is reason to believe that condensation might have occurred, leave the device for several hours without turning on the power until the condensation has completely dried out.
- Avoid setting all equalizer controls and faders to their maximum. Depending on the condition of the connected devices, doing so may cause feedback and may damage the speakers.
- Do not apply oil, grease, or contact cleaner to the faders. Doing so may cause problems with electrical contact or fader motion.
- When turning on the AC power in your audio system, always turn on the power amplifier LAST, to avoid speaker damage. When turning the power off, the power amplifier should be turned off FIRST for the same reason.
- Always turn the power off when the device is not in use.

■ Connectors

XLR-type connectors are wired as follows (IEC60268 standard): pin 1: ground, pin 2: hot (+), and pin 3: cold (-).

Information

■ About this manual

- The illustrations as shown in this manual are for instructional purposes only, and may appear somewhat different from those on your device.
- Steinberg and Cubase are registered trademarks of Steinberg Media Technologies GmbH.
- The company names and product names in this manual are the trademarks or registered trademarks of their respective companies.
- This manual covers the MG20XU/MG20, MG16XU/MG16, and MG12XU/MG12 mixing consoles. In cases where different features need to be described for each model, the features for the MG16XU/MG16 and MG12XU/MG12 will be enclosed in brackets. (Example: CH13/14 – 19/20 {CH9/10 – 15/16} {CH1 – 7/8})
- In this manual, the term “MG” refers to all models collectively. The term “XU models” refers to the MG20XU, MG16XU, and MG12XU.
- Throughout this manual, all panel illustrations show the panel of the MG16XU, unless noted otherwise.

The model number, serial number, power requirements, etc., may be found on or near the name plate, which is at the rear of the unit. You should note this serial number in the space provided below and retain this manual as a permanent record of your purchase to aid identification in the event of theft.

Model No.

Serial No.

(rear_en_01)

Thank you for purchasing the Yamaha MG20XU/MG20/MG16XU/MG16/MG12XU/MG12 mixing console. Please read this manual thoroughly to get the most out of the product and ensure long-term, trouble-free use. After reading this manual, please keep it available for future reference.

Main Features

D-PRE and High-Quality Operational Amplifiers

Mono input channels are equipped with “D-PRE” Class-A discrete microphone preamplifiers. The D-PRE head amplifier features an inverted Darlington circuit used in high-end audio devices. This circuit uses multi-stage amplifying elements to ensure high current and low impedance, for an audio texture with crispness and richness in the low and mid frequencies. Combined with the specially-designed “MG01” operational amp, the overall result is full-bodied reproduction of low frequencies as well as sustained high frequencies. Input channels feature combo jacks, which can accept both XLR and TRS connectors. In addition, PAD circuitry allows line level input, to accommodate a wide variety of instruments.

Improved Convenience with Built-in Universal Switching Power Supply

The MG series features a universal switching power supply. This power supply supports input voltages of 100 V to 240 V, for stable operation even in environments where power voltage fluctuates easily. Lowering the impedance of the power supply has resulted in improved sound quality with a faster attack. An AC inlet allows simple installation in environments where portability is required, as well as when mounting the mixing console in a rack.

24 High-Quality Digital Effects (XU Models)

The XU models (MG20XU/MG16XU/MG12XU) feature 24 built-in effects that are based on SPX algorithms used by professionals. In particular, the high-quality reverb and delay expand the spatial quality of the sound with remarkable realism and naturalness.

24-bit/192 kHz USB Audio Interface (XU Models)

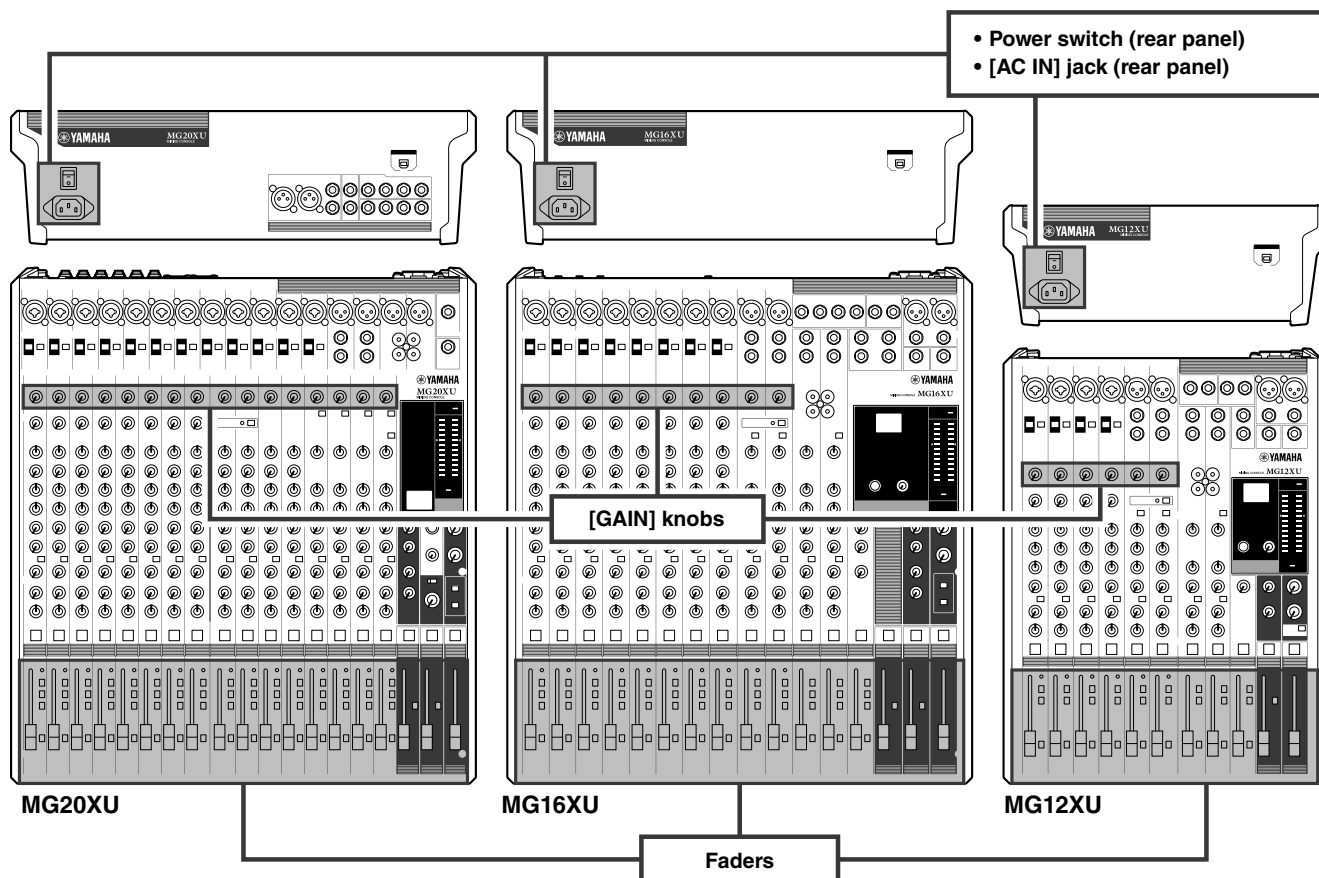

The XU models (MG20XU/MG16XU/MG12XU) feature a USB 2.0 audio interface capable of 24-bit/192 kHz sound quality. With the audio interface you can play back music from your computer, or use DAW software such as Cubase AI to record the mixer output. The XU models support USB Audio Class 2.0 so you can use them with USB Audio Class 2.0 compliant tablets and other devices, without the need to install drivers. The USB protocol uses asynchronous data transfer. Audio data is transferred based on a highly precise audio clock signal from the MG, for high quality recording and playback.

Accessories (Please check that they are included with your mixing console.)

- AC Power Cord
- Rack-Mount Kit (The RK-MG12 for the MG12XU/MG12 is sold separately.)
- Cubase AI Download Information (XU models):
Contains the access code necessary for downloading the Steinberg DAW software “Cubase AI”.
Visit the following Yamaha website for details on downloading and installing Cubase AI, and making necessary settings.
http://www.yamahaproaudio.com/mg_xu/
- Technical Specifications (English only):
Includes general specifications, input/output characteristics, dimensions, as well as a block diagram and level diagram.
- Owner’s Manual (this book)

Quick Start Guide

We'll begin this guide by connecting a pair of speakers and generating some stereo output. Note that the operations and procedures will vary somewhat according to the input devices you are using.

Step 1 Preparing the Power Supply

1. Make sure that the power switch of the unit is set to the “O” position (off).

2. Connect the socket of the included power cord to the [AC IN] jack on the rear panel.
3. Plug the power cord into a power outlet.

Step 2 Making Connections

1. Turn all the faders and [GAIN] knobs completely down.
2. Connect the microphones, instruments, and/or speakers you intend to use.

For details on making connections, see “Setup Examples” (pages 12 – 13), “Front Panel” and “Rear Panel” (pages 14 – 15).

Step 3 Powering Up the System

To prevent an unwanted burst of noise from the speakers, power up the devices in the following order: peripheral devices (instruments, microphones, etc.) → mixing console → power amps (or powered speakers).

Reverse this order when turning the power off.

⚠ WARNING

Be sure to turn the power on/off in the order given in Step 3 above every time you use the mixer. Failure to do so may result in loud noise bursts that can damage your equipment, your ears, or both.

NOTICE

If you are using condenser microphones that require phantom power, turn the mixer's [PHANTOM +48V] switch on before turning on the power to the power amps or powered speakers. See page 17 for details. Also, read the details about the [PHANTOM +48V] switch on page 17 before turning the switch on.

Step 4 Getting Sound to the Speakers

1. Turn on () the [PFL] switches for each channel you are using.

NOTE

- When you turn on the [PFL] switch for a channel, you can monitor the signal for that channel through headphones connected to the [Phones] jack. The level of the signal is also shown on the level meter indicator, allowing you to more accurately check signal levels. After checking levels, turn the [PFL] switches off.
- When a [PFL] switch is turned on, the [PFL] indicator below the level meter flashes.

2. While playing your instrument or speaking into a microphone, adjust the input signal with the [GAIN] knob until it goes past the “0” () position on the level meter only occasionally.

NOTE

If you connect a portable audio player, synthesizer, or other equipment to a stereo input channel that has no [GAIN] knob, adjust the output level on the connected device.

3. Turn on () the [ON] switches for each channel you are using.
4. Turn on () the [ST] switches for each channel you are using.

5. Turn off () all [PFL] switches.

Confirm that the [PFL] indicator below the level meter is off.

6. Turn on () the [ON] switch for the [STEREO] master.

7. Raise the [STEREO] master fader to the “0” position.

8. Set the channel faders to create the desired initial balance.

9. Adjust the overall volume of the [STEREO] master fader.

The overall headphone level is adjusted by the [PHONES] knob.

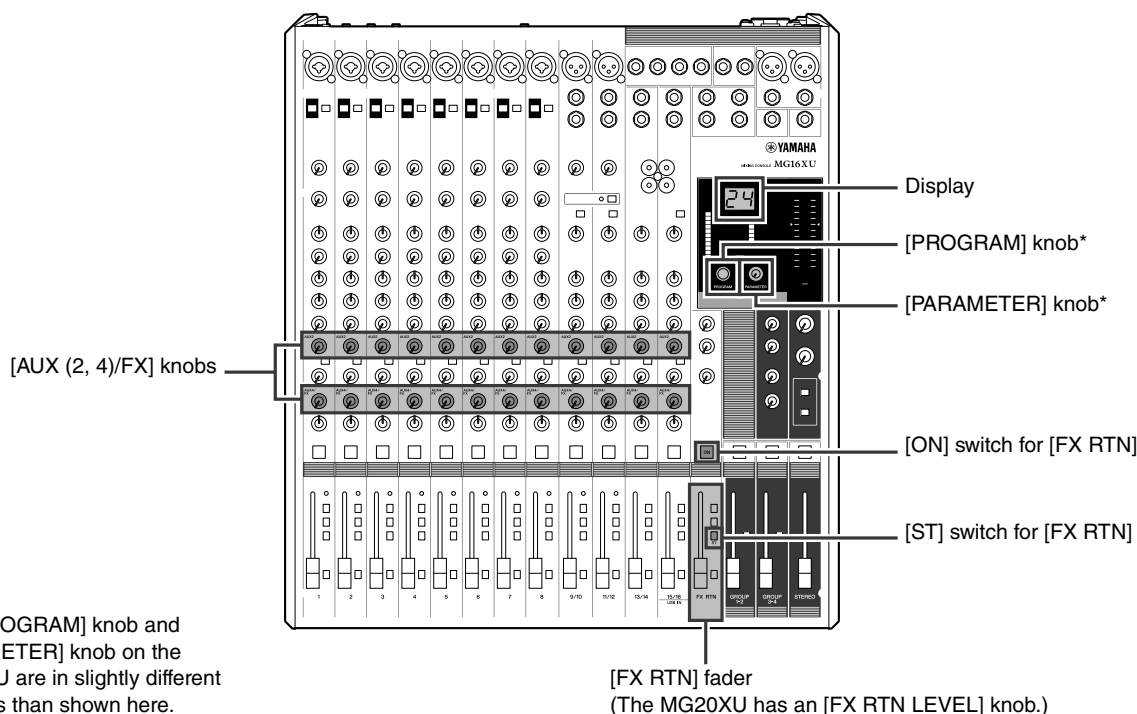

NOTE

If the level meter [PEAK] indicator lights frequently, slightly lower the channel faders to avoid distortion.

■ Adjusting Tone and Level

- Equalizer ([HIGH]/[MID]/[LOW]) page 18
- [COMP] knobs page 17
- [GAIN] knobs page 17
- Channel faders page 19

Step 5 Using the Built-in Effects (XU Models Only)

1. Turn the [PROGRAM] knob to select the desired effect, and then press the knob to enable it.

The selected effect program number flashes in the display.
For details about available effects, see the Effect Programs on page 33.

2. Turn on () the [ON] switch for [FX RTN].
3. Turn on () the [ST] switch for [FX RTN].

4. Raise the [FX RTN] fader to the “0” position.

5. Use the [AUX (2, 4)/FX] knobs to adjust the effect depth for each channel.

6. Use the [FX RTN] fader to adjust the overall effect depth of the selected effect.

You can use the [PARAMETER] knob (page 23) to adjust effect parameters such as reverb time and delay time. For details about the parameters of each effect that can be adjusted with the [PARAMETER] knob, see page 33.

■ Using Reverb and Delay

Your mixes can be further enhanced by using the built-in ambience effects such as reverb or delay.

Reverb and Delay Time

The optimum reverb time for a piece of music will depend on the music's tempo and density, but as a general rule longer reverb times are good for ballads, while shorter reverb times are more suited to up-tempo tunes. Delay times can be adjusted to create a wide variety of repeating rhythmic effects. When adding a delay to a vocal, for example, try setting the delay time to dotted eighth notes () corresponding to the tune's tempo.

Reverb Level

While working for many hours on a mix, your sense of hearing will start to dull slightly. This can lead to the perception that tracks with excess processing sound like the perfect mix. To avoid falling into this trap, start with reverb level all the way down, then gradually bring the reverb into the mix until you can just hear the difference. Any more than this normally becomes a special effect or, worse yet, makes the sound muddy and indistinct. In general, you don't want reverb to dominate the mix, so you should apply it judiciously.

Setup

Setup Examples

1. Sound Reinforcement for Live Performance

NOTE

On the MG20XU/MG20, the [SEND] jack, [GROUP OUT] jack, [MONITOR OUT], jack, and [STEREO OUT] jack are located on the rear panel.

2. For Events and Parties

Front Panel

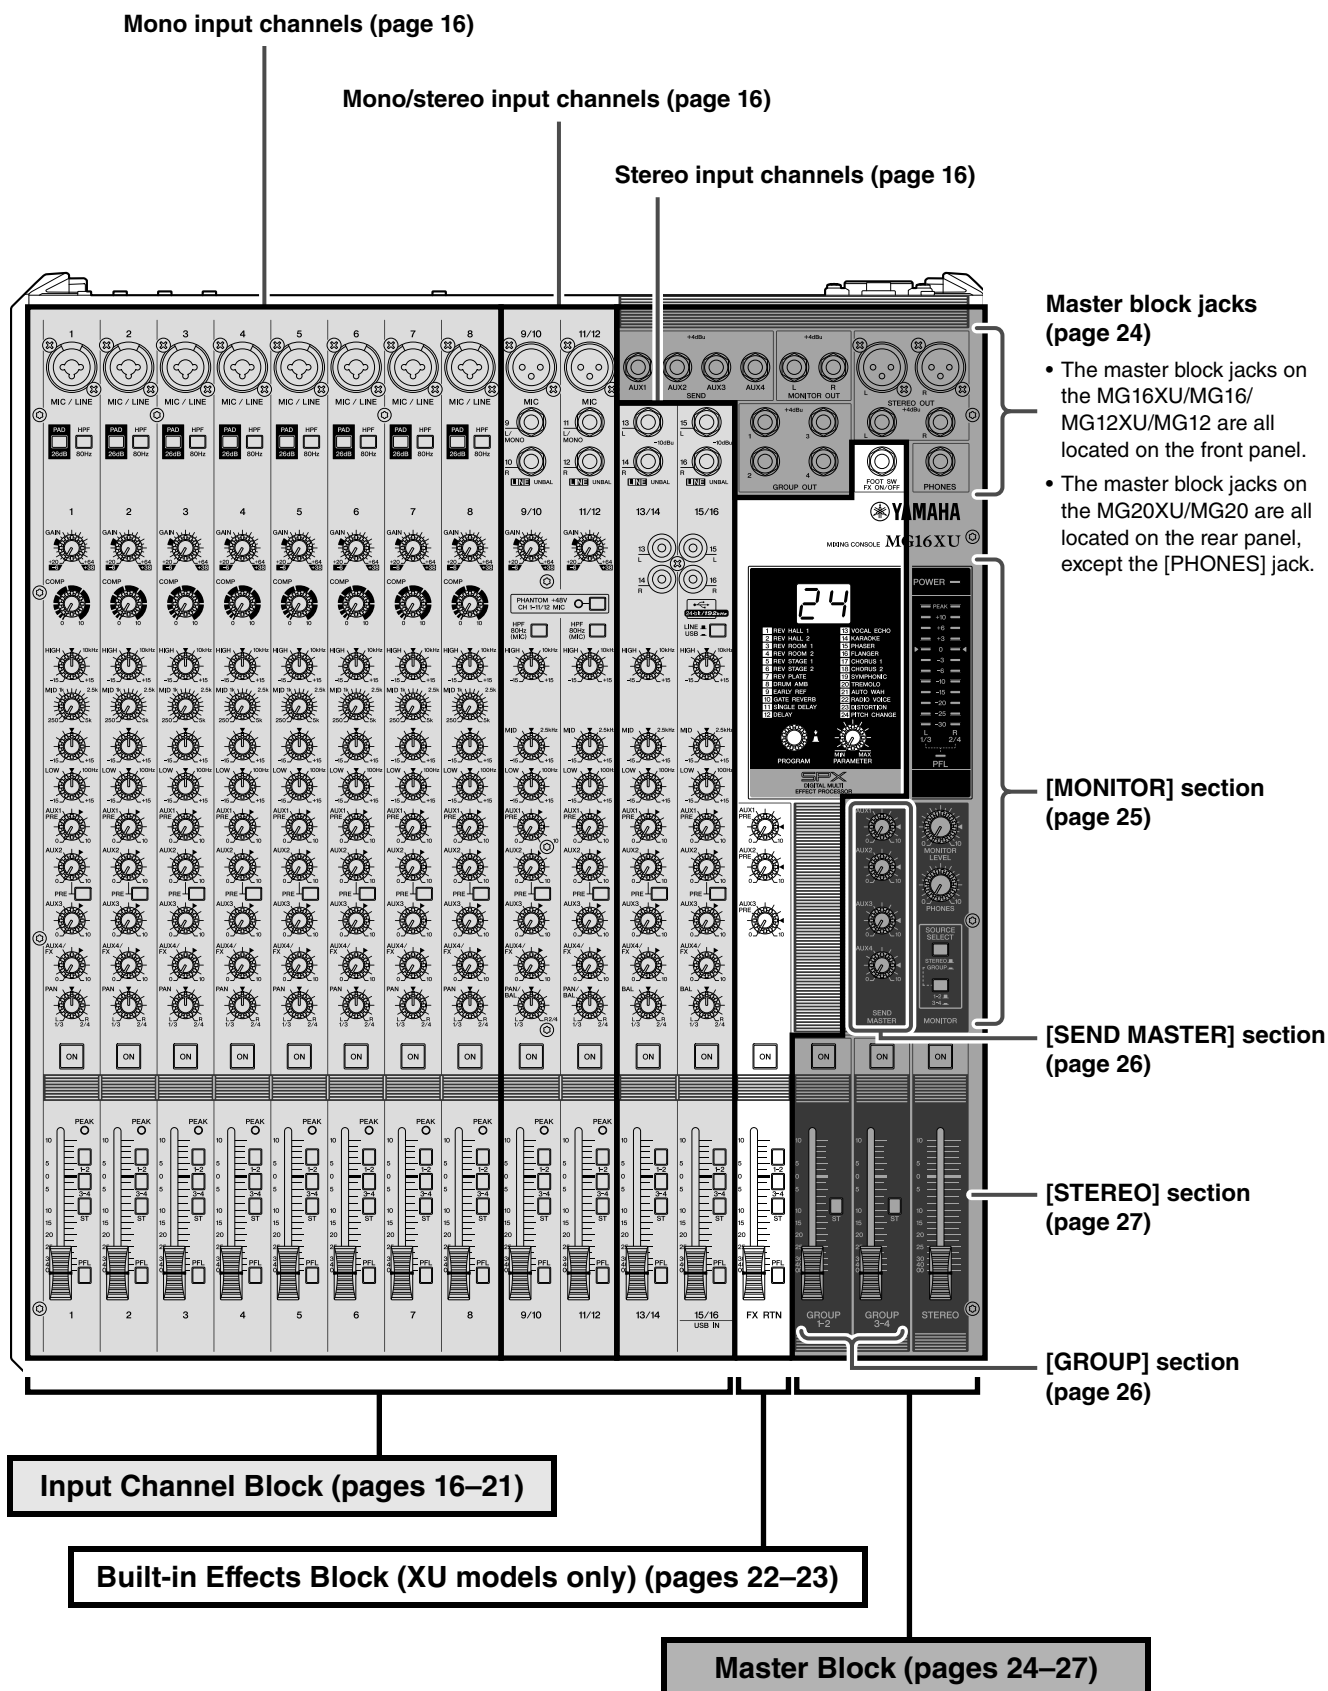

NOTE

On the MG20XU/MG20, the [SEND] jack, [GROUP OUT] jack, [MONITOR OUT] jack, and [STEREO OUT] jack are located on the rear panel.

Controls and Connectors

Front Panel

The number and locations of jacks and controls vary slightly by model. Carefully check the name indicated near each jack and control while referring to this manual.

Rear Panel

Input Channel Block

Mono input channels

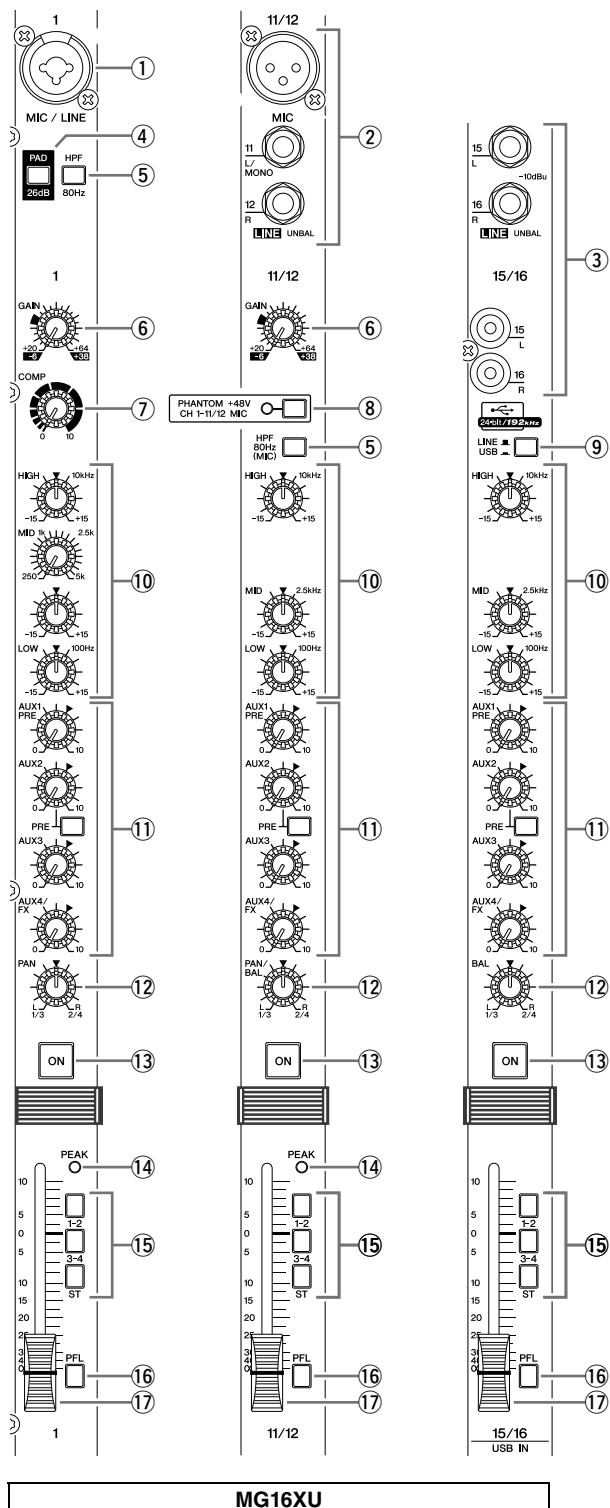

1 – 12
(MG20XU/MG20)
1 – 8
(MG16XU/MG16)
1 – 4
(MG12XU/MG12)

Mono/stereo input channels

13/14 – 19/20
(MG20XU/MG20)
9/10 – 11/12
(MG16XU/MG16)
5/6 – 7/8
(MG12XU/MG12)

Stereo input channels

13/14 – 15/16
(MG16XU/MG16)
9/10 – 11/12
(MG12XU/MG12)

① Mono input jacks

MG20XU/MG20: 1 – 12
MG16XU/MG16: 1 – 8
MG12XU/MG12: 1 – 4

- **[MIC/LINE]:** Accepts both XLR connectors and phone connectors. Connect the microphones and or instruments you intend to use.

② Mono/stereo input jacks

MG20XU/MG20:
13/14 – 19/20
MG16XU/MG16:
9/10 – 11/12
MG12XU/MG12:
5/6 – 7/8

- **[MIC]:** Balanced XLR microphone input jacks (1: ground, 2: hot, 3: cold)
- **[LINE (L/MONO, R)]:** Unbalanced phone type line stereo input jacks (Unbalanced phone-type and RCA stereo input jacks on the MG20XU/MG20)

NOTE

On any given channel, you may use either a phone jack or RCA jack, but not both.

③ Stereo input jacks

Phone type

MG16XU/MG16: 13/14 – 15/16
MG12XU/MG12: 9/10 – 11/12

RCA type

MG16XU/MG16: 13/14 – 15/16
MG12XU/MG12: 9/10 – 11/12

- **LINE [L, R]:** These are stereo input jacks (unbalanced input) for connecting line-level instruments, such as electric keyboards and audio equipment. Two jack types are provided: phone type and RCA pin type.

NOTE

On any given channel, you may use either a phone jack or RCA jack, but not both. If both types of jack are used, only the phone jack will function.

④ [PAD] switch

When this switch is turned on (), the input signal from the [MIC/LINE] jack of the mono input channel is attenuated by 26 dB. Turn this switch off () if you've connected a microphone or other device with a low input level to the channel. Turn it on () if you've connected a line-level device.

NOTE

There may be some noise when operating switches. To prevent this, turn the [ON] switch of a channel off before operating other switches.

⑤ [HPF] (High Pass Filter) switch

MG20XU/MG20: 1 – 12

13/14 – 19/20

MG16XU/MG16: 1 – 8

9/10 – 11/12

MG12XU/MG12: 1 – 4

5/6 – 7/8

Turning this switch on () will apply a high-pass filter that attenuates frequencies below 80 Hz in the signal by a slope of 12 dB/octave.

NOTE

Turning the [HPF 80Hz (MIC)] switch on will apply a dedicated high-pass filter only to the signal from the [MIC] jacks.

⑥ [GAIN] knobs

For adjusting the gain of the input signal. Mono input channels have a [PAD] switch ④ that lets you change the range of this control.

The adjustable gain range is as follows.

[PAD] switch	Range
ON	-6 dB to +38 dB
OFF	+20 dB to +64 dB

⑦ [COMP] knobs

For adjusting the amount of compression applied to the channel. As the [COMP] knob is turned to the right the threshold, ratio, and output gain are adjusted simultaneously.

- **Threshold:** +22 dBu to -8 dBu
- **Ratio:** 1:1 to 4:1
- **Output gain:** 0 dB to +7 dB
- **Attack time:** Approximately 25 ms
- **Release time:** Approximately 300 ms

NOTE

Avoid setting the compression too high; since the resulting higher average output level may lead to feedback.

⑧ [PHANTOM +48V] switch and indicator

This switch toggles phantom power on and off. Turn this switch on () to supply DC+48 V to the XLR input jacks. The indicator lights when this switch is on. Turn this switch on when using one or more phantom-powered condenser microphones.

NOTICE

- Be sure to leave this switch off () if you do not need phantom power.
- When turning phantom power on (), pay careful attention to the following to prevent damage or noise in the mixing console or connected equipment.
 - Turn this switch off if equipment that does not use phantom power is connected to the XLR input jacks.
 - Do not disconnect XLR connector cables while this switch is on.
 - Set output controls such as the [STEREO] master fader and the [GROUP] fader to their minimum levels before turning phantom power on or off.

⑨ [LINE /USB] switch (XU models)

Switches the audio source input on CH19/20 USB IN {CH15/16 USB IN} {CH11/12USB IN} between the [LINE] stereo input jack and the [USB 2.0] jack.

NOTE

The volume input from computers through [USB 2.0] jack can be adjusted by Attenuator Function. Please see Attenuator Function (page 28).

⑩ Equalizer ([HIGH]/[MID]/[LOW])

Equalization Types and Characteristics

	3 Band [MID] Sweep	3 Band	2 Band
MG20XU/ MG20	CH 1 – 12	CH 13/14 – 19/20	—
MG16XU/ MG16	CH 1 – 8	CH 9/10 – 15/16	—
MG12XU/ MG12	—	CH 1 – 7/8	CH 9/10 – 11/12

The equalizer shapes the high, mid, and low audio frequencies. Turning the knob to the right amplifies (boosts) the corresponding frequency band, while turning it to the left attenuates (cuts) the band. Setting the knob to the middle “▼” position produces a flat response in the corresponding band. The upper knob sets the variable mid frequency, while the lower knob sets the amount of attenuation or boost (counter-clockwise/clockwise) for the range. The following table shows the EQ type, frequency, and cut/boost range for each of the three bands.

Band	Type	Frequency	Cut/Boost range
HIGH	Shelving	10 kHz	±15 dB
MID	Peaking	2.5 kHz*	
LOW	Shelving	100 Hz	

* The signals from mono input jacks of the MG20XU/MG20 and MG16XU/MG16 can be adjusted from 250 Hz to 5 kHz.

⑪ [AUX 1 – 4] knobs
[PRE] switches
[AUX (2, 4)/FX] knobs

MG20XU/MG16XU: [AUX1],
[AUX2 – 3], [AUX4/FX]
MG20/MG16: [AUX1], [AUX2 – 4]
MG12XU: [AUX1], [AUX2/FX]
MG12: [AUX1 – 2]

The levels of each signal sent to the AUX 1 – 4 buses from each channel can be adjusted independently. On stereo input channels, the Line L (odd) and Line R (even) input signals are mixed before being sent to each AUX bus. Adjust the knobs so that they are near or at the “▼” (nominal) position.

NOTE

- The [AUX1] knob indicated “PRE” adjusts the level of the pre-fader signal (before fader adjustment).
- The [PRE] switch on [AUX1] and [AUX2] can be used to select whether the pre-fader (▼) (the signal before fader adjustment) or post fader (■) (the signal after fader adjustment) signal is sent to the AUX bus by the [PRE] switch.
- The [AUX4/FX] and [AUX2/FX] knobs are used to adjust the level of the signal sent to the FX bus (built-in effects) in addition to the AUX bus. The same signal level is sent to the AUX buses and FX buses connected to these knobs.

⑫ [PAN] knobs
[PAN/BAL] knobs
[BAL] knobs

- **PAN:** Sets the position of the sound image within the stereo field. This knob adjusts the volume balance of each channel sent to the STEREO L/R bus. When the knob is set to the 12 o'clock position, the channel's sound will be sent to the L and R of the STEREO L/R bus at the same volume. In this case, the sound image is positioned at the center. If the bus assign switch [1-2] or [3-4] is pressed, this knob adjusts the volume balance sent to the GROUP bus. When the knob is set to the 12 o'clock position, the same volume is sent to each GROUP bus. If the knob is turned completely to the left, the signal is sent to the GROUP 1 or GROUP 3 bus only; if the knob is turned completely to the right, the signal is sent to the GROUP 2 or GROUP 4 bus only.

- **BAL:** Sets the volume balance of the signal sent from each stereo input channel (L/R) to the STEREO L/R bus or GROUP bus. When this knob is set to the 12 o'clock position, the sound of the stereo input channels (L/R) will be sent to the STEREO L/R bus or GROUP 1, 3/2, 4 bus at the same volume.

- **PAN/BAL:** This knob performs both [PAN] and [BAL] functions. You can use this as a [PAN] control when sound is input to the [LINE] (L/MONO) jack, and as a [BAL] control when sound is input to both the [LINE] (L) and [LINE] (R) jacks.

13 [ON] switches

Turn this switch on () to send the respective channel's signal to the buses. The switch lights when on. When this switch is off (), the respective signal input is not sent to the AUX bus or GROUP bus.

NOTE

- Even if the [ON] switch is off, the PFL signal from each channel can still be monitored via the [PHONES] jack.
- To minimize noise, turn the [ON] switch off for any unused channels.

14 [PEAK] indicators

The peak level of the post-EQ signal is detected, and the PEAK indicator lights red when the level reaches 3 dB below clipping.

15 Bus assign switch

These switches determine the bus(es) to which each channel's signal is sent. Turn the switch on () to output the signal to the corresponding buses.

- **[1-2] switch:** Assigns the channel's signal to the GROUP 1-2 buses.
- **[3-4] switch:** Assigns the channel's signal to the GROUP 3-4 buses.
- **[ST] switch:** Assigns the channel's signal to the STEREO L/R buses.

NOTE

To send the signal to each bus, engage the [ON] switch 13.

16 [PFL] (Pre-fader Listen) switch

When the [PFL] switch is on (), the channel pre-fader signal is output to the [MONITOR OUT] and [PHONES] jacks for monitoring. In this condition, the audio from the STEREO L/R buses or GROUP buses that could be heard in the [MONITOR OUT] and [PHONES] jacks can no longer be heard. When a [PFL] switch is turned on, the [PFL] indicator below the level meter flashes.

17 Channel faders

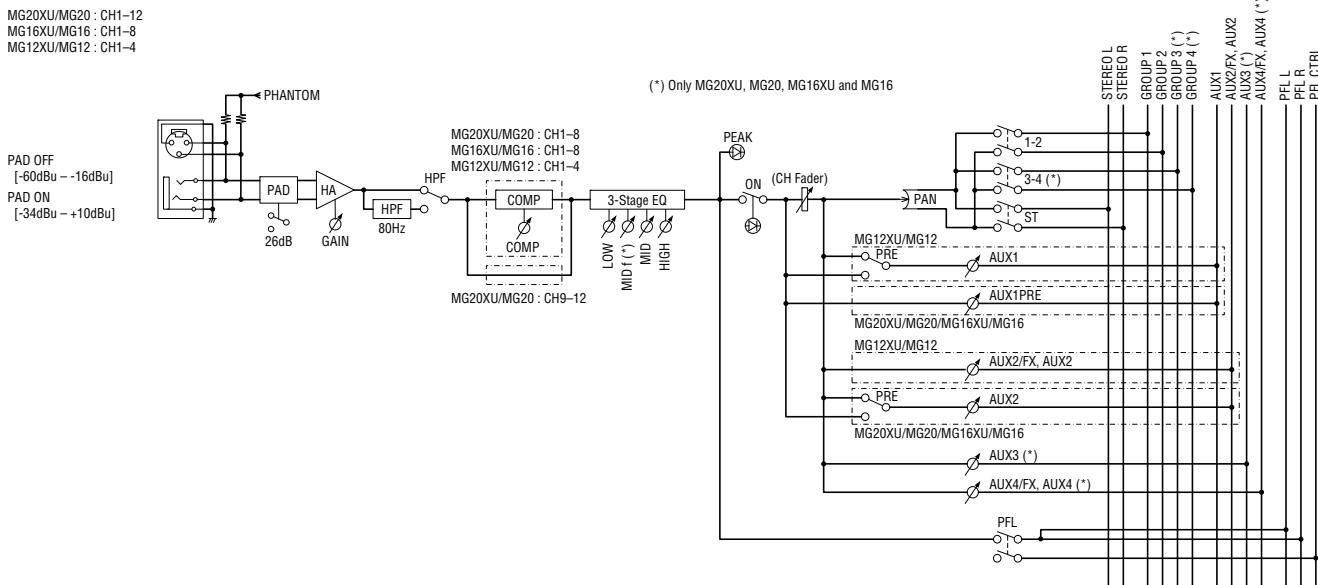

For adjusting the level of the channel signal. Use these controls to adjust the balance between the various channels.

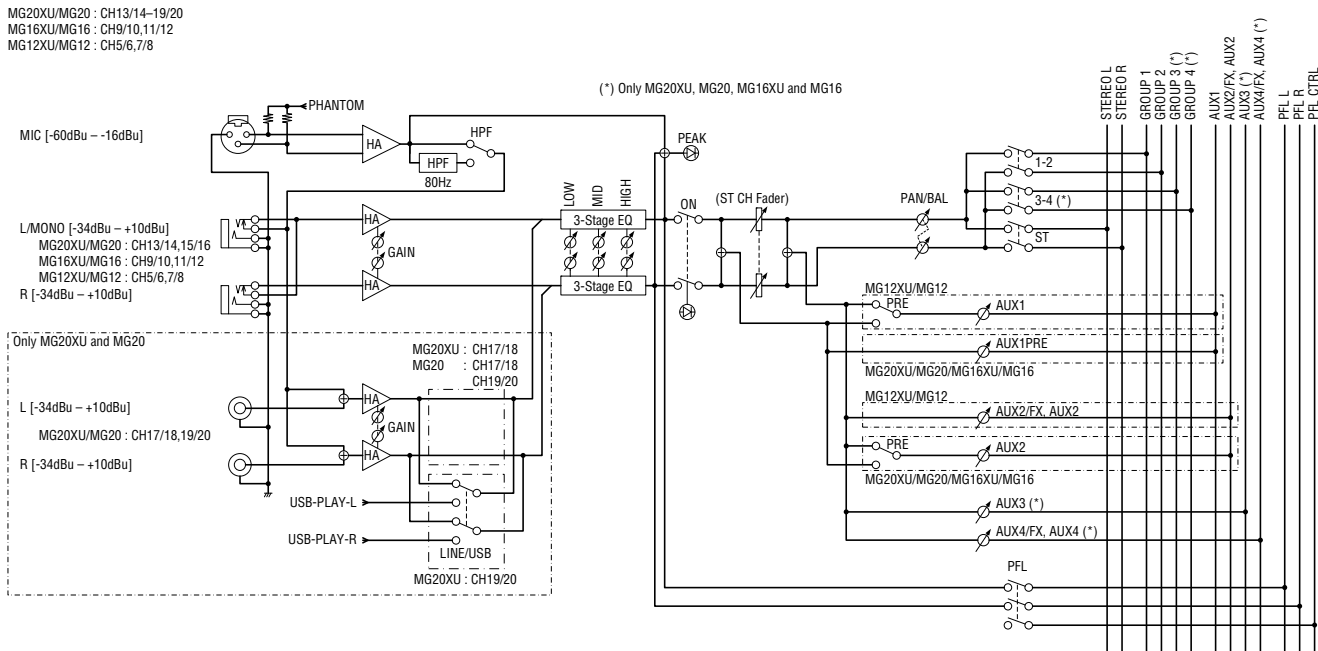

NOTE

To minimize noise, set the fader sliders for any unused channels all the way down.

● Mono input channels

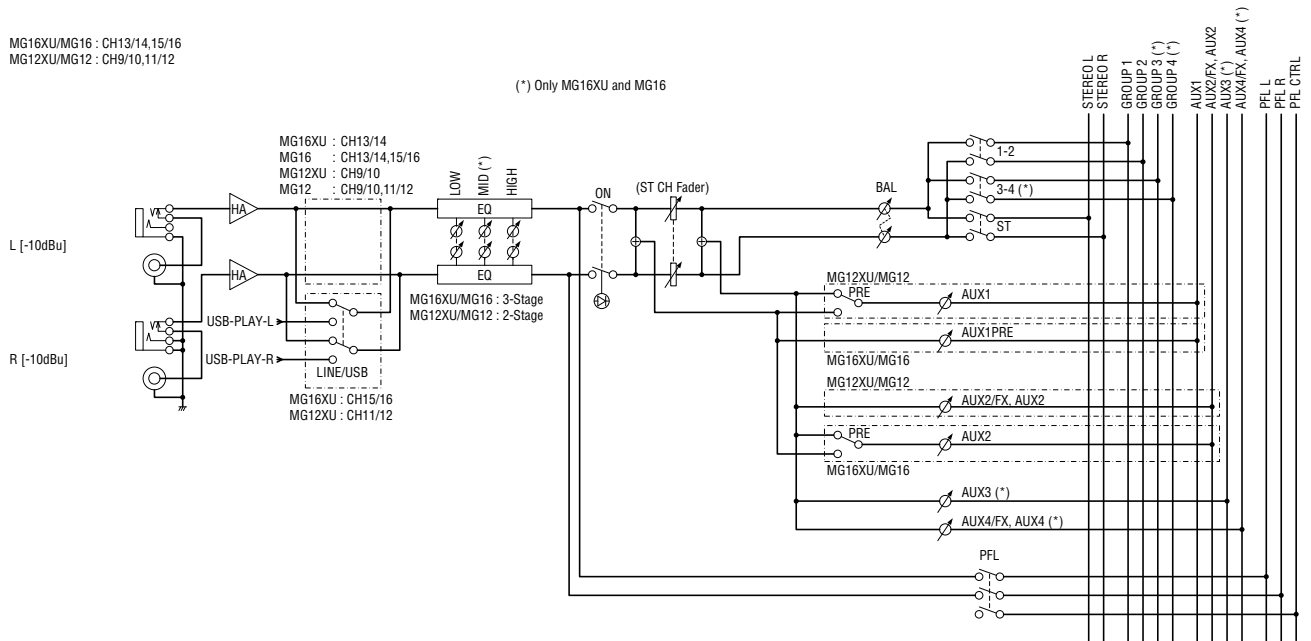

● Mono/stereo input channels

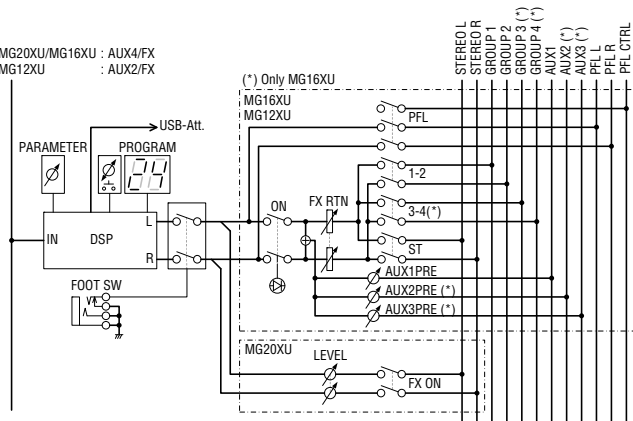

● Stereo input channels

MG16XU/MG16 : CH13/14,15/16
 MG12XU/MG12 : CH9/10,11/12

(*) Only MG16XU and MG16

Built-in Effects Block (XU Models Only)

YAMAHA

MIXING CONSOLE MG16XU

① Display

Indicates the effect program number selected with the [PROGRAM] knob ③. The number flashes during selection; however, if several seconds pass without a selection being made, the program returns to the last number selected.

② Effect program list

1	REV HALL 1	13	VOCAL ECHO
2	REV HALL 2	14	KARAOKE
3	REV ROOM 1	15	PHASER
4	REV ROOM 2	16	FLANGER
5	REV STAGE 1	17	CHORUS 1
6	REV STAGE 2	18	CHORUS 2
7	REV PLATE	19	SYMPHONIC
8	DRUM AMB	20	TREMOLO
9	EARLY REF	21	AUTO WAH
10	GATE REVERB	22	RADIO VOICE
11	SINGLE DELAY	23	DISTORTION
12	DELAY	24	PITCH CHANGE

This is the list of built-in effect programs. For details about these programs, see the “Effect Programs” on page 33.

③ [PROGRAM] knob

Selects one of the 24 built-in effects. Turn the knob to select the desired effect, and then press the knob to enable it.

NOTE

- You can also select the desired effect by turning the knob while holding it down.
- The [PROGRAM] knob can be used to adjust the volume of audio playback from a computer. For details, see the “Attenuator Function” (page 28).

④ [PARAMETER] knob

For adjusting the parameter (depth, speed, etc.) for the selected effect. The last value used with each effect type is saved.

NOTE

When you change to a different effect type, the mixer automatically restores the value that was previously used with the newly selected effect (regardless of the current position of the [PARAMETER] knob).

⑤ [AUX1 – 3] knobs (MG16XU)
[AUX1] knob (MG12XU)

For adjusting the level of the signal sent from the built-in effect unit to the AUX bus.

NOTE

- The [AUX1] knob indicated "PRE" adjusts the level of the pre-fader signal (before fader adjustment).
- The [FX RTN] fader does not affect the level of the signal sent to the AUX bus.

⑥ [FX ON] switch (MG20XU)
[ON] switch (MG16XU/MG12XU)

MG20XU

MG16XU/MG12XU

This button turns the corresponding built-in effect on or off. When the function is on (■), the switch lights.

NOTE

If this switch is on and the foot switch ([FOOT SW] jack ⑩) is used to turn off the built-in effect, the switch flashes.

⑦ Bus assign switch (MG16XU/MG12XU)

MG16XU

MG12XU

These switches determine the bus(es) to which the signal of the built-in effects is sent. Turn the switch on (■) to output the signal to the corresponding buses.

- [1-2] switch: Assigns to the GROUP 1-2 buses.
- [3-4] switch: Assigns to the GROUP 3-4 buses.
- [ST] switch: Assigns to the STEREO L/R bus.

⑧ [PFL] (Pre-fader Listen) switch
(MG16XU/MG12XU)

When the [PFL] switch is on (■), the [FX RTN] pre-fader (MG16XU/MG12XU only) signal is output to the [MONITOR OUT] and [PHONES] jack for monitoring.

⑨ [FX RTN LEVEL] knob (MG20XU)
[FX RTN] fader (MG16XU/MG12XU)

MG20XU

MG16XU/MG12XU

These adjust the level of the effect sent from the built-in effects to the GROUP 1-2 (MG16XU, MG12XU), 3-4 (MG16XU), and STEREO L/R buses.

⑩ [FOOT SW] (Foot Switch) jack

Connect a foot switch to this phone type input jack. An optional Yamaha FC5 foot switch (sold separately) can be used to toggle the effects ON and OFF.

Master Block

① [SEND] jacks

MG20XU/MG20/MG16XU/MG16: [AUX1 – 4]
MG12XU/MG12: [AUX1 – 2]

You use these jacks, for example, to connect to an external effect device or a stage/studio monitoring system. These are impedance-balanced* phone-type output jacks.

* Impedance-balanced

Since the hot and cold terminals of impedance-balanced output jacks have the same impedance, these output jacks are less affected by induced noise.

② [GROUP OUT] jacks

These impedance-balanced TRS phone jacks output the [GROUP 1-2 and 3-4] (MG20XU/MG20/MG16XU/MG16) signals. Use these jacks to connect to the inputs of a multi-track recorder, external mixer, or another similar device.

③ [MONITOR OUT] jacks

Connect these impedance-balanced TRS phone jacks to your operator monitoring system.

NOTE

When the [PFL] indicator is flashing, the signal for channels where the [PFL] switch is pressed is output.
When the [PFL] indicator is off, the signal for the buses selected in the [MONITOR] section ⑥ is output.

④ [STEREO OUT] jacks

These are XLR type and TRS phone-type balanced output jacks that output the mixed stereo signal. The signal level is adjusted by the [STEREO] master fader before it is output. You can use these jacks, for example, to connect to the power amplifier driving your main speakers.

⑤ [PHONES] jack

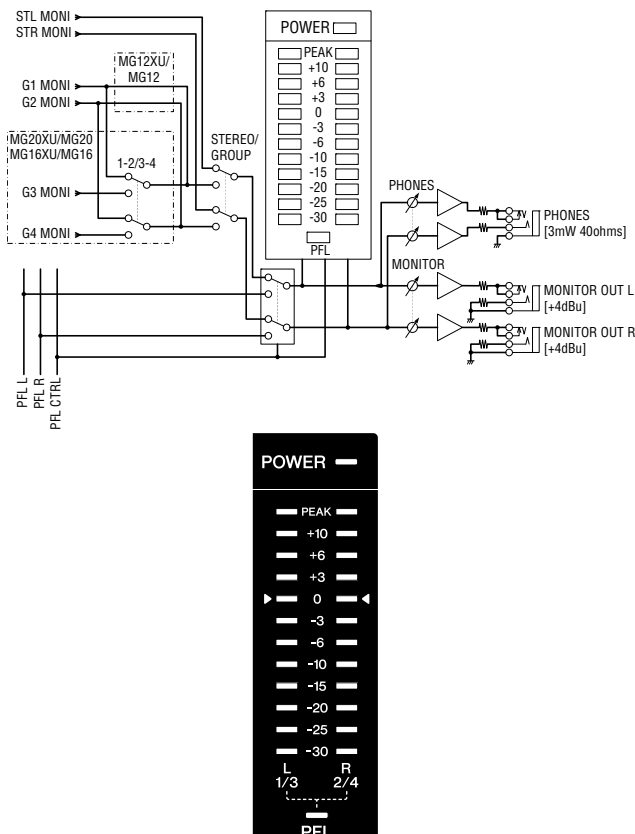

PHONES

Connect a pair of headphones to this TRS phone jack.

NOTE

- The [PHONES] jack outputs the same signal as the [MONITOR OUT] jacks.
- When the [PFL] indicator is flashing, the signal for channels where the [PFL] switch is pressed is output. When the [PFL] indicator is off, the signal for the buses selected in the [MONITOR] section ⑥ is output.

⑥ [MONITOR] section

• [POWER] indicator

This indicator lights up when the mixer's power is on ().

• Level meter

The level meter LED shows the level of the signal in the STEREO L/R and GROUP buses, or selected with [PFL] switches. The "0" () segment corresponds to the nominal output level. The level meter [PEAK] indicator lights when output reaches the clipping level.

• [PFL] indicator

When the [PFL] switch is on, the indicator flashes.

MG20XU/MG20
MG16XU/MG16

MG12XU/MG12

• [MONITOR LEVEL] knob

For adjusting the level of the signal output to the [MONITOR OUT] jack.

• [PHONES] knob

For adjusting the level of the signal output to the [PHONES] jack.

• [SOURCE]/[SOURCE SELECT] (Monitor signal selection switch)

Sets the signal sent to the [MONITOR OUT] jack, [PHONES] jack, and level meter. You can use this switch to select the signal from the STEREO L/R buses, GROUP 1-2 buses, or GROUP 3-4 buses (MG20XU/MG20/MG16XU/MG16).

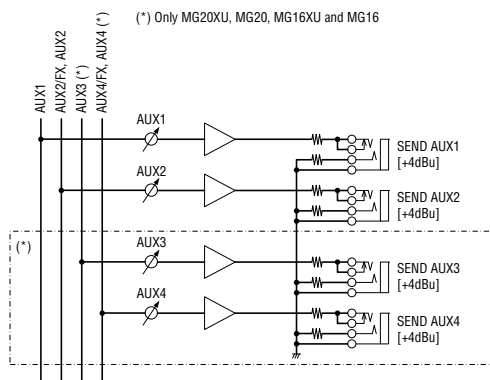

• MG12XU/MG12

STEREO L/R buses: [STEREO] ()
GROUP 1-2 buses: [GROUP] ()

• MG20XU/MG20/MG16XU/MG16

STEREO L/R buses: [STEREO] ()
GROUP 1-2 buses: [GROUP] (), [1-2] ()
GROUP 3-4 buses: [GROUP] (), [3-4] ()

⑦ [SEND MASTER] section

MG20XU/MG20/MG16XU/MG16: [AUX1 – 4] knobs
MG12XU/MG12: [AUX1 – 2] knobs

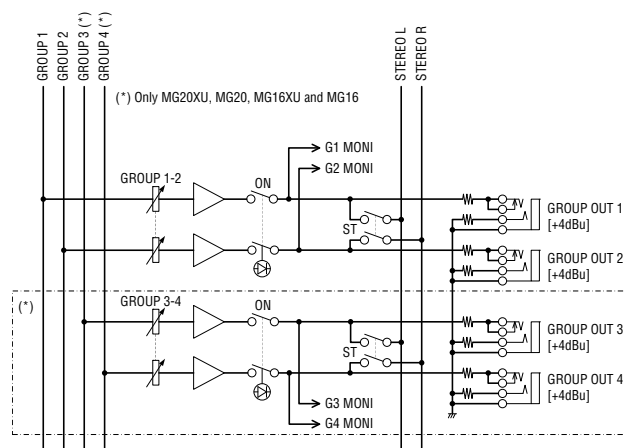

**MG20XU/MG20
MG16XU/MG16**

**MG12XU/
MG12**

For adjusting the levels of the signals output to the [SEND] jacks and [AUX1 – 4].

⑧ [GROUP] section

• [ON] switch

Turn this switch on () to activate the [GROUP] fader. The switch lights when on.

• [GROUP 1-2] fader

For adjusting the level of the signal output to the [GROUP OUT 1, 2] jacks.

• [GROUP 3-4] fader (MG20XU/MG20/MG16XU/MG16)

For adjusting the signal level to the [GROUP OUT 3, 4] jacks.

• [ST] switch

If this switch is on (), the signals are sent to the STEREO L/R bus via the [GROUP 1-2, 3-4] faders. The GROUP 1 and 3 signal goes to the STEREO L bus, and the GROUP 2 and 4 signal goes to the STEREO R bus.

⑨ [STEREO] section

• [ON] switch

Turn this switch on () to enable the [STEREO] master fader. The switch lights when on.

• [STEREO] master fader

For adjusting the level of the signal output to the [STEREO OUT] jack.

Power Block

• [— / O] POWER switch

Turns power to the unit on or off. Press the switch to the “ — ” position to turn on the power. Press the switch to the “ O ” position to turn off the power.

NOTICE

- Note that the trace current continues to flow even while the switch is in the off position. If you do not plan to use the mixer for a while, be sure to unplug the power cord from the wall outlet.
- Rapidly turning the unit on and off in succession can cause it to malfunction. After turning the unit off, wait for at least 6 seconds before turning it on again.

• [AC IN] jack

Connect the included power cord here. First, connect the power cord to this unit, and then plug it into an AC outlet.

USB Block (XU Models Only)

only MG20XU/MG16XU/MG12XU

• [USB 2.0] jack

Connects to a computer via a USB cable. The signal from the STEREO L/R buses is output to the computer. (This signal is not affected by the [STEREO] master fader.) A USB driver might be required for computer input/output. You can download the driver from the following Yamaha website, and install it on your computer.

http://www.yamahaproaudio.com/mg_xu

When the [ST] switch of a channel which has a [LINE  / USB ] switch is on while DAW software is being used, a loop is formed and feedback or howling may result.

[USB 2.0] Connection Precautions

Be sure to observe the following points when connecting to a computer's [USB 2.0] interface. Failure to observe these rules can result in computer freezes/hang-ups and possibly data loss or corruption. If the mixer or computer does hang up, restart the application and/or computer and turn the power to the mixer off and then on again.

NOTICE

- Use an A/B type USB cable. The cable should be no more than 1.5 meters long. A USB 3.0 cable cannot be used.
- Be sure to wake the computer from sleep/suspended/standby mode before making a connection to the computer's [USB 2.0] connector.
- Connect the mixer to the computer before turning the mixer power on.
- Always perform the following two operations before turning the mixer's power on or off, or connecting or disconnecting the USB cable.
 - Exit all applications.
 - Confirm that no data is being sent from the mixer.
- Allow at least six (6) seconds between turning the mixer on or off, and plugging or unplugging the USB cable.

■ Attenuator Function

The [PROGRAM] knob ③ (page 22) can be used to adjust the volume of audio playback from a computer.

1. Press the [PROGRAM] knob five times consecutively to display the attenuation value (dB).
2. Turn the [PROGRAM] knob to set it between -24 dB to 0 dB. (The minus sign is not displayed.)
3. Press the [PROGRAM] knob again to exit the setting.

When the attenuator is enabled, the dot lights at the lower right of the display.

Troubleshooting

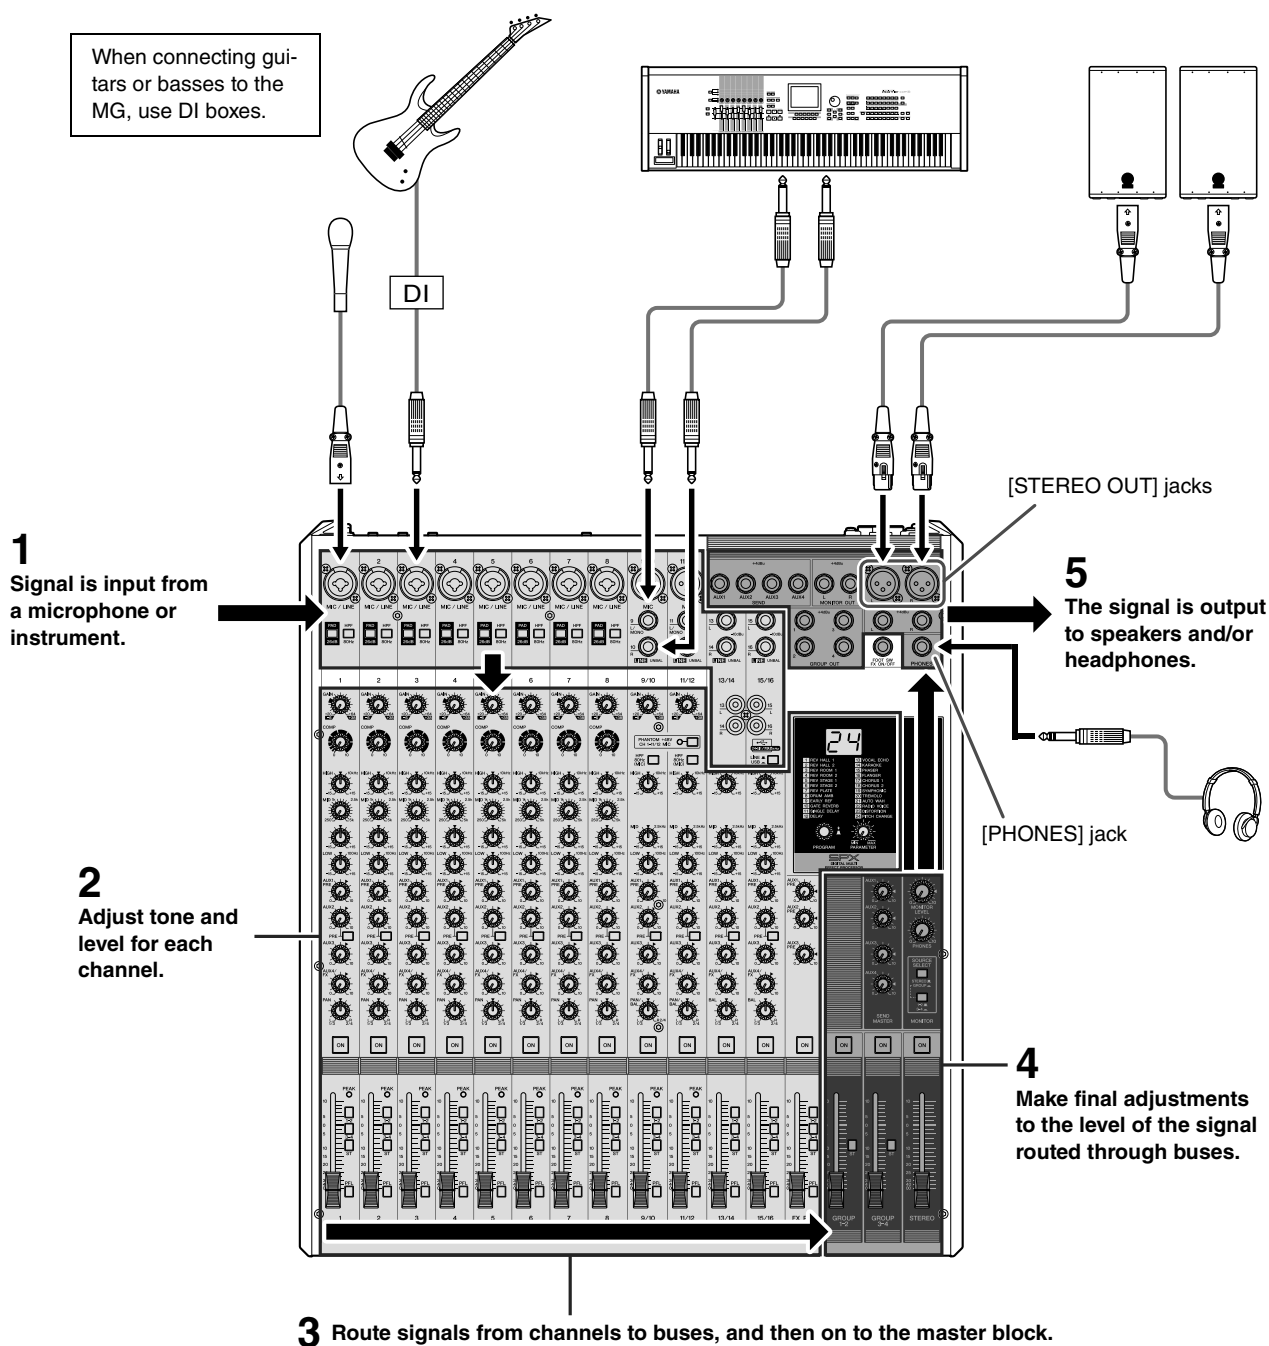

When No Sound Is Output

Refer to this section when no sound is output or the volume is very low. This information is for when sound is output from the [STEREO OUT] jacks or the [PHONES] jack.

For details about these functions, see “Controls and Connectors” on pages 14 – 28.

■ STEP 1 Connections and Signal Flow

Check if the instruments, microphones, and speakers are connected correctly, and if any of the cables are damaged.

■ STEP 2 Setting Switches and Controls

Check the overall balance

Use the settings shown in the illustration to check the overall balance from speakers or headphones.

To monitor the signal of each channel

You can use the level meter and headphones to check the pre-fader signal for each channel.

- **[PFL] switches:** Turn on (—) for the channel(s) you want to check.
- **[MONITOR LEVEL] knob:** Adjust the level.

Other

■ The power does not come on.	<input type="checkbox"/> Is the mixer connected to an independent power source (generator, etc.) or a power strip with switches? Check that the power of that device is turned on.
■ No sound is output.	<input type="checkbox"/> Are external instruments (including microphones) and speakers connected correctly? <input type="checkbox"/> Are your cables shorted? <input type="checkbox"/> Are the [GAIN] knobs for each channel, channel faders, [STEREO] master fader, and [GROUP] faders adjusted to appropriate levels? <input type="checkbox"/> Are the bus assign switches and [LINE  /USB ] switch set appropriately?
■ No sound is output from the [STEREO OUT] jack.	<input type="checkbox"/> Are the [ON] switch and [ST] switch for the channels you are using turned on? <input type="checkbox"/> Is the [STEREO] master [ON] switch turned on?
■ No sound is output from the [SEND (AUX1 – 4)] jacks	<input type="checkbox"/> Are the [SEND MASTER] knobs and [AUX 1 – 4] for each channel set appropriately? <input type="checkbox"/> Are the [ON] switches for the channels you are using turned on?
■ No sound is output from the [MONITOR OUT] jack or [PHONES] jack.	<input type="checkbox"/> Are the [PFL] switches for the channels you are not using turned on? Turn the [PFL] switches off.
■ The sound is low, distorted, or noisy.	<input type="checkbox"/> Is the microphone connected to a [MIC] jack or a [MIC/LINE] jack? <input type="checkbox"/> When using a condenser microphone, is the [PHANTOM +48V] switch turned on? <input type="checkbox"/> Is the [PAD] switch on? Turn this switch off for sources with low output levels, such as microphones. <input type="checkbox"/> Is the output signal level for the instrument connected to the mixer appropriate? <input type="checkbox"/> When connecting an instrument with an output level of +4 dBu, either turn on the [PAD] switch on a mono input channel or use a stereo input channel. <input type="checkbox"/> Where an input channel provides both a XLR input jack and a phone input jack, or a phone input jack and an RCA pin jack, are there connections made at both jacks? Use only one of these jacks. <input type="checkbox"/> Are the [GAIN] knobs for each channel, channel faders, [STEREO] master fader, and [GROUP] faders adjusted to appropriate levels? <input type="checkbox"/> Are effect or compressor levels too high? Use the [FX] knob, [FX RTN] fader, [FX RTN LEVEL] knob, and [COMP] knob to lower their levels.
■ Effects are not applied.	<input type="checkbox"/> Are the [FX] knobs for each channel adjusted to appropriate levels? <input type="checkbox"/> Is the [ON] button for [FX RTN] turned on? <input type="checkbox"/> Are the [PARAMETER] knob and [FX RTN] fader adjusted to appropriate levels? <input type="checkbox"/> Is the [FX RTN] bus assign switch set appropriately? <input type="checkbox"/> If external effects are connected to the [SEND(AUX1 – 4)] jacks, are the [AUX1 – 4] knobs for [SEND MASTER] set appropriately?
■ Speaking voices are not clear.	<input type="checkbox"/> Is the [HPF] switch turned on? <input type="checkbox"/> Is the equalizer ([HIGH]/[MID]/[LOW]) adjusted appropriately?
■ No mixer monitor signal is output.	<input type="checkbox"/> Are powered speakers connected to the [MONITOR OUT] jacks? Use the [MONITOR LEVEL] knob to adjust the signal output from the [MONITOR OUT] jacks.
■ Left and right levels are different for a stereo signal input.	<input type="checkbox"/> Is [PAN] set to the center? If panned to the center, try reversing the left and right input connections. If, after switching the left and right connections, the side with the low volume level also switches, check the instrument or device that is the source of the signal. <input type="checkbox"/> Are you using the same type of cable to connect both the left and right input signals? Cables with built-in resistors will attenuate the signal.
■ The sound level is unstable and inconsistent.	<input type="checkbox"/> Is the compressor level set too high? Use the [COMP] knob to lower the level.
■ The volume of audio playback from a computer need to be adjusted.	<input type="checkbox"/> Use the “Attenuator Function”. For details, see page 28.

If any specific problem should persist, please contact your Yamaha dealer.

Appendix

General Specifications

0 dBu = 0.775 Vrms, Output impedance of signal generator (Rs) = 150 Ω

European Models

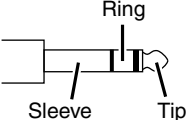

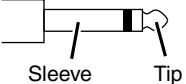

Inrush Current based on EN 55103-1:2009
3.0 A (on initial switch-on)
2.0 A (after a supply interruption of 5s)
Conforms to Environments: E1, E2, E3 and E4

Effect Programs

No.	Program	Parameter	Description
1	REV HALL 1	Reverb Time	Reverb simulating a large space such as a concert hall.
2	REV HALL 2	Reverb Time	
3	REV ROOM 1	Reverb Time	Reverb simulating the acoustics of a small space (room).
4	REV ROOM 2	Reverb Time	
5	REV STAGE 1	Reverb Time	Reverb simulating a large stage.
6	REV STAGE 2	Reverb Time	
7	REV PLATE	Reverb Time	Simulation of a metal-plate reverb unit, producing a more hard-edged reverberation.
8	DRUM AMB	Reverb Time	A short reverb that is ideal for use with a drum kit.
9	EARLY REF	Room Size	An effect which isolates only the early reflection components from reverberation, creating a 'flashier' effect than conventional reverb.
10	GATE REV	Room Size	An effect which cuts halfway the tail-end of the reverberation, making a more powerful sound.
11	SINGLE DLY	Delay Time	An effect which repeats the same sound only once. Shortening the delay time produces a doubling effect.
12	DELAY	Delay Time	Feedback delay adding multiple delayed signals.
13	VOCAL ECHO	Delay Time	Echo designed for conventional vocals.
14	KARAOKE	Delay Time	Echo designed for karaoke (sing-along) applications.
15	PHASER	LFO* Freq	Cyclically changes the phase to add modulation to the sound.
16	FLANGER	LFO* Freq	Adds modulation to the sound, producing an effect similar to the rise and fall sound of a jet engine.
17	CHORUS 1	LFO* Freq	Creates a thicker ensemble-like sound by adding the multiple sounds with different delay times.
18	CHORUS 2	LFO* Freq	
19	SYMPHONIC	LFO* Depth	Multiplies the sound for thicker texture.
20	TREMOLO	LFO* Freq	An effect which cyclically modulates the volume.
21	AUTO WAH	LFO* Freq	A wah-wah effect with cyclical filter modulation. The [PARAMETER] knob adjusts the speed of the LFO* that modulates the "wah" filter.
22	RADIO VOICE	Cutoff Offset	Recreates the lo-fi sound of an AM radio. The [PARAMETER] knob adjusts the frequency band to be emphasized.
23	DISTORTION	Drive	Adds a sharp-edged distortion to the sound.
24	PITCH CHANGE	Pitch	An effect which changes the pitch of the signal.

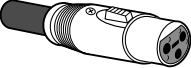

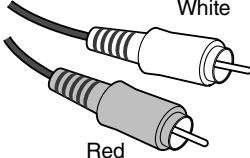

* "LFO" stands for Low Frequency Oscillator. An LFO is normally used to periodically modulate another signal, using different waveform shapes and modulation speeds.

Jack and Connector List

Jacks and Connectors	Polarities	Configurations
MIC/LINE, MIC, STEREO OUT	Pin 1: Ground Pin 2: Hot (+) Pin 3: Cold (–)	<div>INPUT</div>  <div>OUTPUT</div>  <div>XLR Jack</div>
MIC/LINE*, AUX SEND, GROUP OUT, MONITOR OUT, STEREO OUT	Tip: Hot (+) Ring: Cold (–) Sleeve: Ground	 <div>TRS Phone Connector</div>
PHONES	Tip: L Ring: R Sleeve: Ground	
LINE (stereo input channels)	Tip: Hot Sleeve: Ground	 <div>TS Phone Connector</div>

* These jacks also can be connected with TS phone connectors. If you use TS phone connectors, the connection will be unbalanced.

Connector Types

<p>XLR</p> <p>This 3-pin connector is resistant to externally induced noise, and is used primarily for balanced connections. With properly designed receiving circuitry, cables with this type of connector can also be used for unbalanced signals. XLR type connectors are the standard for microphone connections as well as most professional audio gear.</p>	 <div>Male</div>  <div>Female</div>
<p>Phone</p> <p>Phone connectors are available in TRS and TS types. TRS types are used for stereo headphone jacks, insert jacks, and also for carrying balanced signals in many cases. TS types are used to carry unbalanced signals -for example, electric guitar cables.</p>	 <div>TRS Phone</div>  <div>TS Phone</div>
<p>RCA Pin</p> <p>This type of unbalanced connector is most commonly found on home audio and video equipment. RCA type pin jacks are often color coded: white for left audio channel and red for right audio channel, for example.</p>	 <div>White</div> <div>Red</div>

Rack Mounting

The MG12XU/MG12 require at least 10 U* of rack space. To take into account the cable connections, we recommend to ensure 11 U* of rack space. The MG20XU/MG20/MG16XU/MG16 require at least 12 U* of rack space. To take into account the cable connections, we recommend to ensure 14 U* of rack space.

* 10 U is approximately 445 mm, 11 U is approximately 489 mm, 12 U is approximately 533 mm, and 14 U is approximately 623 mm.

■ Precautions for Rack Mounting

- This unit is rated for operation at ambient temperatures ranging from 0 to 40 degrees Celsius. If you install this unit along with other devices in a poorly ventilated rack, the ambient temperature inside the rack may rise, resulting in inefficient performance. Be sure to rack-mount in the following conditions so the unit does not overheat.
- When mounting the unit in a rack with devices such as power amplifiers that generate a significant amount of heat, leave more than 1 U of space between the MG and other equipment. Also, either leave the open spaces uncovered or install appropriate ventilating panels to minimize the possibility of heat buildup.
- To ensure sufficient airflow, leave the rear of the rack open and position it at least 10 centimeters from walls or other surfaces. If the rear of the rack cannot be left open, install a commercially available fan or similar ventilating option to secure sufficient airflow. If you've installed a fan kit, there may be cases in which closing the rear of the rack will produce a greater cooling effect. Refer to the rack and/or fan unit manual for details.

	Rack-Mount Kit	Right and Left Designation of Rack-Mount Kit
MG20XU/ MG20	Accessories	—
MG16XU/ MG16	Accessories	—
MG12XU/ MG12	Option sold separately Model Name: RK-MG12	Indicated L/R (Locate the bracket designated 'L' on the left, and the bracket designated 'R' on the right)

■ Mounting Procedures

(The illustration shows the MG12XU.)

1. Use a screwdriver to loosen the screws on the sides of the mixer (six total).

2. Use the screws removed in Step 1 to install the rack-mount kit (included with MG20XU/MG20/MG16XU/MG16, optional RK-MG12 for the MG12XU/MG12 sold separately) on the mixer.

NOTICE

Be sure to use the screws removed in Step 1. Using other screws can cause damage.

3. Mount the unit into the rack, and fasten it into place.

⚠ CAUTION

This unit is heavy, and should be lifted by two people when mounting it into a rack.

* The MG20XU/MG20/MG16XU/MG16 require at least 12 U of rack space. To take into account the cable connections, we recommend to ensure 14 U of rack space.
